*Washington, May 10, 1888.*

SIR: I have the honor to acknowledge the receipt of your circular letter of the 3d instant calling for information relative to certain employees in this office appointed since March 4, 1885.

In reply I have the honor to state that no persons who have been appointed in this office since March 4, 1885, have been or are now employed "in any position, class, or grade different from the one to which they were appointed," except those who were originally appointed to assist in the investigation of Indian depredation claims in the depredation division of this office, and who have since been transferred to other positions in the classified service, in accordance with the opinion of the Civil-Service Commission "that the clerks and copyists now employed upon Indian depredation claims are within the classified Departmental service of the Interior Department, and that vacancies occurring in that division must be filled under the civil-service act and rules."

In accordance with this ruling Miss Mattie E. Seabrook, Mrs. Kate F. Whitehead, and Mr. H. W. Andrews were transferred by the honorable Secretary of the Interior, upon the recommendation of the Commissioner of Indian Affairs, to the positions of copyists in this office, at a compensation of \$900 per annum.

DEPARTMENT OF THE INTERIOR,  
UNITED STATES PATENT OFFICE,  
*Washington, May 31, 1888.*

SIR: I have the honor to acknowledge the receipt of your circular order of the 3d instant, referring for information copy of Senate resolution of April 30, 1888, asking that the Secretary of the Interior forward to the Senate a complete list of all persons appointed in this Department since March 4, 1885, with statement showing the duties performed by each person.

I herewith transmit a list of all persons who have been appointed in this Bureau since March 4, 1885, who have been or are now employed in a position, class, or grade different from the one to which they were appointed.

In connection with this report I desire to state that the duties performed by assistant examiners and clerks of the respective grades have never been specifically defined and distinguished. The duties performed by assistant examiners and clerks in the higher grades differ only in the matter of expertness or experience from those rendered by persons in the lower grades. The duties of a fourth assistant examiner may not materially differ from those of a third assistant, the line of demarcation being determined by the nature of the inventions under consideration. Applications of an intricate character would naturally be examined by the person having the most skillful training and extended experience. Precisely the same is true of the duties performed by clerks of the various classes or grades.

Persons borne on the rolls as model attendants have a variety of duties assigned them, one important duty being clerical in character, viz, keeping account of models which are removed for examination, repair, etc., entering in books data relating to the filing of models, the disposition of the same, whether finally patented, rejected, abandoned, or withdrawn. Therefore, while such employés are in the unclassified service their duties may be wholly or in part clerical, and they have been changed from one duty to another and from one room to another as the service required.

In this Bureau there are in the unclassified service ninety-two skilled laborers, at a salary of \$720 per annum. The duties of these persons have never been specified or defined, but vary as the exigencies of the service require and demand. A large proportion of these employés is permanently engaged in clerical duty, as, for instance, stenography, type-writing, book-keeping, proof-reading, and copying, while the services of a few have been found to be of greater value in manual occupations. But it may be necessary to shift this force at any time, and the discretion has always been reposed in the Commissioner of Patents to so change and regulate the duties of this grade as will result in disposing of the work by the most practical and business-like methods and to the best advantage of the service.

Inasmuch as this office has in the classified service a certain number of copyists whose duties are wholly clerical, receiving the same salary as skilled laborers in the unclassified service, there would seem to be a proper analogy in designating the duties of these latter employés to define them as clerical; and, as stated above, their services have been found to be of the most value when so employed.

The same is true of the grade of \$600. Persons employed in it gradually become familiar with duties of a clerical character and strive to improve themselves by acquiring a knowledge of type-writing and stenography and familiarity with duties belonging to the higher classes,

with a view to promotion, and from time to time, as the force may be temporarily reduced by absence and sickness, are called upon to discharge such duties.

Very respectfully, your obedient servant,

BENTON J. HALL,  
*Commissioner.*

The SECRETARY OF THE INTERIOR.

## PENSION OFFICE.

In the case of Mr. Nicholay Jensen, who was appointed a messenger December 6, 1886, he has been, since his assignment to the division in which he is now serving (the Western), engaged from time to time, as the needs of the service required, in translating letters and evidence filed written in the Scandinavian and German languages.

It is proper to add, in connection with the recall of the special examiners for office duty, that the Civil-Service Commission has decided that the examination for these positions is the same as that for those appointed for the clerical examining force, and the two positions are, consequently, interchangeable. Changes from special examiners to the clerical examining force are made from time to time as vacancies in the latter grade are available.
